# Table of Contents

<b>Acronyms and Abbreviations .....</b>	<b>v</b>
<b>Chapter 1 Executive Summary .....</b>	<b>1-1</b>
1.1 Regional Wastewater System.....	1-1
1.2 What Drives Capacity Demand.....	1-2
1.3 Current Conditions .....	1-4
1.4 Estimated Capacity Needs .....	1-4
1.5 Approach to Providing Capacity and Reducing Cost .....	1-4
1.6 Next Steps .....	1-5
<b>Chapter 2 Background .....</b>	<b>2-1</b>
2.1 Service Area.....	2-1
2.2 Regional Wastewater System.....	2-3
2.2.1 Conveyance and Treatment .....	2-3
2.2.2 Combined Sewers and Separated Sewers .....	2-5
2.3 Assessment of Needs .....	2-6
2.4 Description of System Design Standards.....	2-6
2.5 Other Related Programs .....	2-6
2.5.1 Combined Sewer Overflow (CSO) Planning.....	2-6
2.5.2 Brightwater Planning.....	2-7
<b>Chapter 3 Condition of the Regional Wastewater Conveyance System .....</b>	<b>3-1</b>
3.1 Why Parts of the System Are Near or At Capacity.....	3-1
3.1.1 Portions of the System Are Well Over 40-Years Old .....	3-1
3.1.2 Projections of System Capacity Have Improved.....	3-2
3.1.3 The System Was Built to Varying Capacity Standards Over Time.....	3-3
3.2 Condition of the System.....	3-3
3.3 How the System Condition Was Assessed .....	3-5
3.4 Overview of I/I Program Modeling .....	3-6
3.5 Model Selection, Data Collection, and Modeling Assumptions .....	3-7
3.5.1 Model Selection.....	3-7
3.5.2 Data Collection.....	3-7
3.5.3 The Model Calibration Process .....	3-11
3.5.4 Model Verification Through use of the Hydraulic System Model .....	3-12
3.6 Projecting Peak Flows into the Future .....	3-13
3.6.1 Base Sewage Flow Growth .....	3-13
3.6.2 I/I Growth .....	3-15
3.7 Planning Assumptions .....	3-15
<b>Chapter 4 Conveyance Needs .....</b>	<b>4-1</b>
4.1 List of CSI Projects .....	4-1
4.2 Comparison of Projects and Estimated Costs to the Updated RWSP .....	4-3
4.3 Correlation to I/I Flows.....	4-4
4.4 Approach to Providing Capacity and Reducing Cost .....	4-7
4.5 Next Steps .....	4-7

## **Table of Contents**

---

### **List of Tables**

Table 3-1. Planning Assumptions for I/I Modeling .....	3-15
Table 4-1. Conveyance System Improvement Projects and Estimated Project Costs .....	4-1

### **List of Figures**

Figure 1-1. Projected Growth in Base Flow .....	1-3
Figure 1-2. Impacts of I/I on Wastewater Flows .....	1-3
Figure 2-1. Local Sewer Agencies Within King County Wastewater Service Area.....	2-2
Figure 2-2. King County Wastewater Service Area.....	2-4
Figure 2-3. Combined and Separated Wastewater Conveyance Systems .....	2-5
Figure 3-1. Sources of Infiltration and Inflow .....	3-2
Figure 3-2. Map of Conveyance System Capacity Needs.....	3-4
Figure 3-3. Impacts of I/I on Wastewater Flows .....	3-5
Figure 3-4. Flow Meter Locations .....	3-10
Figure 3-5. Comparison of Modeled Flow Data to Measured Flow Data.....	3-12
Figure 3-6. Projected Growth in Base Flow .....	3-14
Figure 3-7. Residential, Commercial, and Industrial Growth Rates .....	3-14
Figure 4-1. Conveyance System Improvement Project Locations.....	4-5
Figure 4-2. Conveyance System Improvement Projects in Relation to I/I Levels .....	4-6

Note: Figures 3-2, 4-1 and 4-2 are detailed maps that are also available electronically on the compact disc in the back of this report.

### **Appendices**

- A1 – Model Selection Process
- A2 – Application of the Extended Time Series (ETS) Precipitation and Evaporation
- A3 – Model Basin Delineation Summary
- A4 – Model Calibration
- A5 – Assumptions for Regional I/I Control Program
